Pdf995: the Solution for your Document Publishing Needs

[Click for Testimonials and Client List](#)

The pdf995 suite of products is a complete solution for your document publishing needs, offering ease of use, flexibility in format, and industry-standard security. And all at no cost to you.

[Pdf995](#) is the fast, affordable way to create professional-quality documents in the popular PDF file format. Its easy-to-use interface allows you to create PDF files by simply selecting the "print" command from any application, creating documents which can be viewed on any computer with a PDF viewer. Combined with [pdfEdit995](#) and [Signature995](#), it offers the following features:

The Pdf995 Suite offers the following features, all at no cost:

- | | |
|---|--|
| Automatic insertion of embedded links | Support for custom page sizes |
| Insertion of Bookmarks | Option to attach PDFs to email after creation |
| Support for Digital Signatures | Automatic text summarization of PDF documents |
| Support for 128 bit DES encryption | Easy integration with document management and Workflow systems |
| Append and Delete PDF Pages | n-Up printing |
| Batch Print from Microsoft Office | Automatic page numbering |
| Asian and Cyrillic fonts | Simple Programmers Interface |
| Integration with Microsoft Word toolbar | Option to automatically display PDFs after creation |
| PDF Stationery | Custom resizing of PDF output |
| Combining multiple PDF's into a single PDF | Configurable Font embedding |
| Three auto-name options to bypass Save As dialog | Support for Citrix/Terminal Server |
| Imposition of Draft/Confidential stamps | Easy PS to PDF processing |
| Support for large format architectural printing | Free: Creates PDFs without annoying watermarks |
| Convert PDF to JPEG, TIFF, BMP, PCX formats | Free: Fully functional, not a trial and does not expire |
| Convert PDF to text | Over 2 million satisfied customers |
| Support for XP Fast User Switching and multiple user sessions | Over 350 Enterprise licenses sold worldwide |
| Standard PDF Encryption (restricted printing, modifying, copying text and images) | |

From start to finish, the pdf995 family products are easy-to-use, powerful, and reliable.

All three products are available as **FREE** [downloads](#). The free versions display a sponsor page in your web browser each time you run the software. If you would prefer not to see sponsor pages, you may upgrade by obtaining individual [license keys](#) for each product at any time for \$9.95 each. A [suite license](#) for all three products is also available for \$19.95. Licensing also entitles you to technical support (response within 24-hours) via e-mail.

We also offer group licensing for 25 or more users: view a partial list of [companies](#) which have benefited from our enterprise license program.

We support Windows 95, 98, 2000 and Me, NT 4.0 and XP.

Now you can [link](#) to our site. Read some of our [testimonials](#)!

Costs and Upgrades

PDF995, [PdfEdit995](#) and [Signature995](#) are all **FREE**. However, for \$9.95 each you may purchase [license keys](#) to remove the advertising feature which displays each time you run each of these programs. For \$19.95 you may purchase a [suite key](#) which works for all three of our products. Licensing also entitles you to technical support (response within 24-hours) via e-mail.

Group licensing for 25 or more users is also available: please [inquire](#).

What is the latest version of pdf995?

The latest versions of all of our products are posted on our [Download](#) page. All license keys continue to work with upgraded versions.

How do I determine the version of Pdf995, PdfEdit995 or Signature995 installed on my system?

The version of the software appears at the bottom of the readme file. Before contacting customer support, please be sure you are running the latest versions of Pdf995 software.

Privacy Policy

We do not use cookies. We use IP addresses to administer the site, track user movement and gather demographic information for aggregate use. IP addresses are not linked to personally identifiable information. Names and email addresses gathered from sales will not be shared, sold or rented.

Security

Online transactions through our site use industry-standard SSL encryption to protect users' information. We do not store financial information processed through our site. Some orders are processed by PayPal, RegNow or RegSoft on our behalf. Details of the privacy policies of [PayPal](#) or [Regnow](#) or [RegSoft](#) may be found on their sites.

System Requirements

We support Windows 95, 98, 2000 and Me, NT 4.0 and XP. In order to encrypt and decrypt documents with Signature995 you will need [Internet Explorer 6.0](#) or later; older systems may alternatively install the [Microsoft Internet Explorer High Encryption Pack](#).

Does Pdf995 support Terminal/Citrix Server?

Yes. Both Users and the Print Spooler Service must have read/write access to the pdf995 folder and its subfolders.

How can I programatically generate PDF's or integrate Pdf995 into Workflow processes?

Please see our [Developer's FAQ](#).

Installing to a custom folder

Requires the following versions: pdf995 v5.41 or later; pdfEdit v4.3 or later; signature995 v3.3 or later. In order to install to alternate folders, do the following before installing:

1. Run regedit.exe
2. Create the key: HKEY_LOCAL_MACHINE\SOFTWARE\pdf995
3. Add a STRING named "Path" and set its value to "d:\your folder"

Make sure the specified folder exists. Don't forget the last slash.

How can I can print sheets larger than A3 under NT, Win2k or XP?

Upgrade to pdf995 v5.42 or higher.

How Do I Print from AutoCad?

Pdf995 v5.42 and above includes support for large format printing from AutoCad.

How can I share Pdf995 as a network printer?

Pdf995 v6.094 or later can shared as a network printer by adding TS Enabled=0 to the Parameters section of c:\pdf995\res\pdf995.ini and specifying an auto-name option in PdfEdit995 (see the Developer FAQ for additional auto-naming options). A license key for the number of users accessing the shared PDF995 printer must also be purchased.

How do I restrict printing, modification and copying of text and images from PDF files?

The Pdf995 [Standard Encryption module](#) for Signature995 uses 128 bit RC4 encryption to restrict users from printing, modifying, and copying text and images. It also uses 128 bit RC4 encryption to password protect PDF files. The Standard Encryption module is available for Signature995 v4.0+. It is free and may be downloaded from [Signature995](#).

How do I clear the Pdf995 Printer Queue?

Rebooting will clear the current job in the Pdf995 printer queue. Check the bottom of readme.html to make sure you are running 5.41 or later and upgrade if necessary. You may also add "TS Enabled=0" to the [Parameters] section of c:\pdf995\res\pdf995.ini. Note: This will disable support for XP Fast User Switching and Terminal Server.

Advertising Rates

We offer full-frame window ads and pop-up ads. Click for our current [advertising rates](#).

May I link to your site?

You may link to our site by using our "Get pdf995" [button](#).

Source

PDF995 refers to an unmodified version of GNU Ghostscript and also supports other Postscript-to-PDF converters. GNU Ghostscript is distributed under the [GNU General Public License](#). You may obtain the source code for GNU Ghostscript [here](#).

[PdfEdit995](#) is an easy-to-use utility for pdf995 which enables you to:

1. Create links.
2. Bookmark pages.
3. Automatically attach a PDF to an email message for sending. (This requires that a default MAPI compliant email client such as Microsoft Outlook is specified.)
4. Combine multiple (2 or more) documents into a single PDF document. This can be used to create PDF documents from multiple applications, such as Word, PowerPoint, Excel and even other PDF documents.
5. Specify page size, including support for additional page layouts.
6. Rotate page orientation by 90 degrees, resulting in a "landscape" orientation. This is particularly useful when printing PowerPoint presentations and Excel charts.
7. Create stationery: create letterhead, an embossing, or backgrounds for PDF documents.
8. Include pdf995 and pdfEdit buttons in the Microsoft Word toolbar.
9. Choose from 3 naming options-
 - a. Name the PDF document using the "Save As" dialog (default).
 - b. Automatically name the document and save it in the pdf995\output folder.
 - c. Save all PDF documents to a single filename which you can specify.
10. Embed fonts.
11. Place a stamp (for example, "Confidential") up to 12 characters long on each page of the document printed.
12. Automatically display PDF documents in the default PDF viewer when printing is complete. (This requires that a PDF viewer is installed.)
13. Extract the complete text, or a statistically generated summary, of a document printed with pdf995.
14. Queue Microsoft Office documents for automated printing to the default printer.
15. Specify Image Resolution. Users may specify the image resolution for PDF files created by pdf995. The default is High. Low and medium settings can reduce PDF file size.

16. Include page numbers on the bottom center of the page.
17. Convert each page of a document to an image format (JPEG, PCX , PNG, TIF, or BMP). Users may specify resolution between 1 and 1200 pixels per inch. Lower resolution JPEG images are suitable for use as thumbnails.
18. PSHandler. PdfEdit may be configured to automatically convert .PS files to .PDF when they are double-clicked.

View a [sample document](#) which demonstrates many of pdfEdit995's key features.

Signature995

Security Made Simple

Signature995 is part of a suite of PDF-related products from [pdf995](#). Together they allow you to create, customize, and securely transmit PDF documents quickly, affordably, and easily. Signature995 Version 4.0 is available as a free download.

Also available is our [Standard Encryption Module](#). Standard Encryption uses 128 bit RC4 encryption to restrict users from printing, copying text and images and modifying PDF files. It also uses 128 bit RC4 encryption to password protect PDF files.

Signature995:	Version 4.0	Download
Standard Encryption Module		Download (10 MB)

Signature995 uses Microsoft Cryptographic technologies to give you 128-bit DES encryption, offering a high level of protection for all your Internet communications, including legal documents and financial transactions. Signature995 employs Microsoft digital certificate technologies to create and validate digital signatures. It is both powerful and easy to use. Signature995 supports PDF documents (*.pdf), Microsoft Office documents (*.doc, *.xls, *.ppt) and Zip archives (*.zip) and UltraPdf documents (*.updf).

Unlike other PDF solutions, Signature995 is free to both the sender and the recipient.

It features:

Encryption

Generates a 128 bit key from your password to encrypt PDF documents (*.pdf), Microsoft Office documents (*.doc, *.xls, *.ppt) and Zip archives (*.zip). The encrypted file is placed in the same folder as the original document. It has the double file extension '.encrypt.995.'

Decryption

Decrypts PDF documents, Microsoft Office documents and Zip Archives encrypted with Signature995 if the correct password is supplied. The unencrypted document is placed in the same folder as the encrypted file. It has the additional file extension 'pdf', 'doc', 'xls', 'ppt' or 'zip.'

Sign

Uses your digital certificate to sign a PDF document, Office Document or Zip Archive. If "SecureSign" is checked, the signed document will also be encrypted. The signed file is placed in the same folder as the original document. It has the double extension 'signed.995' or 'securesigned.995.'

Co-sign

Uses your digital certificate to add a signature to a signed or SecureSigned (requires the document's password) document.

Verify

Verifies signatures and displays the Certificates of a signed or SecureSigned (requires the document's password) document.

The free version of Signature995 will display a sponsor page in your web browser each time you run it. If you would prefer not to see sponsor pages, you may download a license key for \$9.95. Send questions and comments to support@pdf995.com.

Digital Certificates:

Signature995 creates an unauthenticated digital certificate the first time it is run. You can learn more about digital certificates as follows: In Microsoft Outlook Express select Tools->Options->Security. You can obtain a free authenticated certificate by clicking "Get Digital ID's."

If you receive an unauthenticated digital certificate in a signed document but you trust the sender, you should install it in the Trusted Root Certification Authorities Store by clicking the "Install Certificate..." button when the Certificate is displayed.

Signature995 Requirements:

In order to encrypt and decrypt documents with Signature995 you will need [Internet Explorer 6.0](#) or later. Older systems may alternatively install the [Microsoft Internet Explorer High Encryption Pack](#).

Signature995

Security Made Simple

Back to [Signature995 Home Page](#)

Standard Encryption Module for Signature995

Standard Encryption for Signature995 is available as a [free download](#) (10 MB). It requires that both [pdf995](#) and [Signature995 \(Version 4.0+\)](#) be installed.

Pdf995 Standard Encryption uses 128 bit RC4 encryption to restrict users from printing, copying text and images and modifying PDF files. It also uses 128 bit RC4 encryption to password protect PDF files.

Unlike other PDF solutions, Signature995 is free to both the sender and the recipient.

1: Encrypting a PDF

Specify the file you wish to encrypt. Select the restrictions you wish to impose on the PDF. You may optionally password protect the document. Click "Encrypt the document." Encrypted.pdf will be created and displayed in your PDF viewer. Encrypted.pdf is a secure version of your PDF. Your original PDF is left unchanged.

2: Encrypting PDFs from the command line

You may encrypt PDFs from the command line with Pdf995 Standard Encryption.

Execute Pdf995 Standard Encryption.exe with the following parameters:

input_file output_file user_password owner_password permissions 128|40

permissions is 8 digit long 0 or 1. Each digit has a particular security function:

AllowPrinting

AllowModifyContents

AllowCopy

AllowModifyAnnotations

AllowFillIn (128 bit only)

AllowScreenReaders (128 bit only)

AllowAssembly (128 bit only)

AllowDegradedPrinting (128 bit only)

Example: permissions to copy and print would be: 10100000

Command line example:

```
c:\pdf995\res\utilities\signature995\Pdf995 Standard Encryption.exe c:\pdf995\input.pdf c:\pdf995\output.pdf "userpassword" "ownerpassword" 10100000 128
```

The free version of Signature995 will display a sponsor page in your web browser each time you run it. If you would prefer not to see sponsor pages, you may [download](#) a license key for \$9.95. Send questions and comments to support@pdf995.com.

To create a PDF file:

Pdf995 is a free tool available for download at www.pdf995.com. Its easy-to-use interface allows you to create PDF files by simply selecting the "print" command from any application, creating documents which can be viewed on any computer with a PDF viewer.

To edit a PDF file:

PdfEdit995 is a free tool available for download at www.pdf995.com/pdfedit.html. With pdfEdit995 you can customize your pdf995 output with an easy-to-use utility: Insert links and bookmarks, access Pdf995 quickly from the Word toolbar, preview documents, combine files, change page orientation, add "Confidential" stamps, create PDF stationery, adjust image resolution, summarize documents, create batch print jobs from Microsoft Office applications and choose from several file naming methods.

To create an UltraPdf file or a Photo Album:

UltraPdf is an exciting, new way to publish and share PDF, HTML and Microsoft Office documents. UltraPdf binds multiple documents into a single, indexed UPDF file making it easy to organize and distribute project documents, presentations and even digital photo albums. UltraPdf is [available free](#) from Pdf995.

Pdf995 Standard Encryption for Signature995 comes with absolutely no warranty. This software contains a version of [iText](#) installed in c:\pdf995\res\modify. iText comes with absolutely no warranty. iText is free software, and you are welcome to redistribute it under certain conditions. For more details see the LGPL license in the c:\pdf995\res\modify folder.
